

PreAlgebra Syllabus

Instructor	Clark Brown	Phone	(702) 714-0133
E-mail	clark@homeschoolalgebra.com . This is the best way to contact me; I check it throughout the day. You can also message me from the Schoology Learning Management System or text me at the phone number above.		
Online Face to Face Help	I am typically available throughout the week to meet with you via video-conference and answer any math questions you may have or assist you with other issues you may be having with the course. Simply email, message me through the Schoology LMS, or text me and I can often meet with you within the hour in the "Zoom Room" at the LMS.		
Availability	I check my e-mail throughout the day and make every effort to respond as soon as possible. If you do not receive a reply in a timely manner, and especially by the next business day, please send me another message or call me (I won't be offended!). I'm here to help you, and if you don't hear from me it's possible I either didn't receive your message or it accidentally got overlooked.		

Course materials and equipment:

<p>Textbook: <u>Prealgebra</u>, 4th or 5th Edition, by Blair, Tobey, Slater. ISBN 978-0321567932 or 978-0321756459</p>		
<p>Calculator: Calculators will typically not be required or allowed on the course assessments except as noted. However, for some computationally intensive problems in the homework you may find it helpful to have a calculator handy. In this class you will want to begin learning how and when to use a calculator appropriately. If you do not already have an adequate calculator, you should consider getting a TI-83 or 84 Plus Graphing Calculator as it is the most popular calculator for math education and will be required in later math courses. DON'T get the TI-85,86,89,92, or Inspire models. A color version is available and will work fine, but is not necessary.</p>		

Course Description:

- This course is a bridge between basic arithmetic and algebra. It introduces signed numbers, basic algebraic concepts and relationships, exponents, polynomials, solving equations, and factoring. It also reviews ratio and proportion, percents, geometry, and unit analysis.

Prerequisite:

- Students must have a sound understanding of the basic concepts of arithmetic to be successful in Prealgebra. Students who are unsure of their skill level should contact the instructor to assess what level they will be most successful at.

Course Goals

- Reinforce the sense of “numeracy” gained in arithmetic with continued practice and applications.
- Review and extend the concepts of arithmetic in the context of signed numbers.
- Think about numbers in abstract terms in the context of unknown quantities.
- Simplify simple algebraic expressions using proper mathematical form and technique.
- Solve simple algebraic equations using the basic properties of numbers.
- Translate real-life problems into mathematical language to easily solve.

Resources for Help:

- **Your Instructor**: Many students find higher level mathematics to be some of their more challenging courses and make the mistake of waiting too long to get help. As your instructor, I am your first and best resource for help! If you find yourself struggling please don't hesitate to contact me!
- **Learning Management System (LMS)**: This course uses the Schoology LMS to organize and manage its resources and to facilitate the submission of course assignments. Instructions will be provided for access upon enrollment.
- **Lecture Videos and Handouts**: I have created short lecture videos explaining nearly every topic and problem type of the course. Links to these videos are included in each lesson folder at the Learning Management System (LMS). A listing of them organized by section is also available in the LMS. Lecture handouts specific to each video are also provided to assist students in taking good notes to facilitate their learning.
- **The Khan Academy** at <http://www.khanacademy.org/>, **HippoCampus** at <http://www.hippocampus.org/Algebra>, and **Mathispower4u** at <http://mathispower4u.yolasite.com/> offer a multitude of short video lectures on nearly every algebra concept. When you are stuck and don't know what else to do, try searching here or on YouTube for immediate help!

Grading Policy:

- **Examinations**: Regular exams will be given at the end of each chapter and will account for 50% of your grade. A comprehensive final exam will be given at the end of the course and account for an additional 20% of your grade. Exam problems are similar to those assigned as homework and as found in the selected problems. The best way to prepare for your exams is to regularly review your lecture notes, homework problems, and selected problems. Exams are closed note and closed book. One 3 x 5 card with notes of your choice will be allowed on the final exam, but NOT on the regular exams. Parents will proctor their student's exams and upload them to the appropriate dropbox in the LMS using the procedure described below.

Regular Exams	50%
Comprehensive Final Exam	20%
Lecture Notes	10%
Homework	10%
Selected Problems	10%
Total	100%

- **Lecture Notes**: 10% of your grade will be awarded simply for watching the lecture videos, taking notes using the fillable lecture notes, and submitting a scanned image of them along with your other assignments to the appropriate dropbox in the Learning Management System. In order to receive credit your lecture notes must be both **neat** and **complete**. At the top of each **set** of lecture notes submitted ((i.e., just one statement for the entire set of notes submitted for each lesson folder), **the student is required to include the following statement: “I have conscientiously viewed / completed _____% of the lecture videos / notes for Lesson Folder _____”**, filling in the blanks appropriately. At the end of the syllabus is a page of these statements that can be clipped and attached instead of handwriting it. See below for instructions about how to submit assignments.

- **Homework:** 10% of your grade will be determined by homework that will be submitted for each lesson folder and checked for general completeness and competency. **Please note carefully that individual problems will not be graded.** It is the student's responsibility to check his/her answers with the back of the book and contact the instructor with questions as needed. However, your understanding of the homework will be tested on the Selected Problems assignments by giving problems that are very similar to those assigned as homework. **At the top of each set of homework sections you submit for each Lesson Folder you are required to include the following statement: "I have shown all work and conscientiously completed ____% of the HW for Lesson Folder ____", filling in the appropriate percentage and sections.** (At the end of the syllabus is a page of these statements that can be clipped and attached instead of handwriting it.) Your homework score will be based upon your self-assessment which I will validate.

One must learn by doing the thing;
for though you think you know it you
have no certainty, until you try.
Sophocles, c.450 BC

- **Selected Problems:** The remaining 10% of your grade will be determined by selected problems that you will work out on paper / pencil and then scan and upload to a dropbox located in the appropriate lessons folder in the LMS. These problems will be specifically chosen to give you an idea of the most important concepts in each section, and that will help prepare you for the exams.
- **Be Neat and Organized and Communicate Effectively:** All written work should be done neatly and in a clear and organized manner. These skills are especially important in mathematics where many mistakes can be avoided simply by taking the time to be neat and organized. All Homework, Selected Problems, and Exams should be done in pencil with a good quality eraser at hand to correct mistakes. Graph paper should be used for all graphing (download for free at LMS), and a 6 inch ruler should be used for drawing straight lines. The student's goal in all written work should be to make it as easy as possible for your instructor to review, and in it to clearly communicate to your instructor your understanding of the material. Wherever applicable the student should use proper English grammar and sentence structure.

Success takes time and willingness
to objectively and honestly analyze
your mistakes. That's the key to
getting smarter at anything in life.
William J. O'Neil

- **Electronic Submission of Assignments:** To facilitate grading of your assignments, **your work must be scanned to a single PDF file**. This can be easily done several ways, including the following:
 1. **CamScanner** is an app available for both Android and iPhones that will allow you to use the camera on a smart phone to scan your work to a pdf.
 2. Alternatively, a computer scanner can be used to accomplish the same thing. These scanners typically comes with software that will scan to a PDF file, or **cutepdf** and **scan2pdf** are free programs that can be downloaded for use with a personal scanner.
 3. A third option would be to take a good quality picture of your work and insert it into a Word document, then use the "SAVE AS..." feature to save the Word document as a PDF file.
 In preparing your written work, keep in mind that you will be scanning and uploading it, so leave a half inch margin and be sure any information you wish to include is within the scanable region.
- **Course Flexibility and Due Dates:** The course has been designed to provide students and their families the flexibility that homeschooling allows. However, learning mathematics requires more effort than many other endeavors, and there is a direct correlation between a student's success in mathematics and the student's regular participation and faithful completion of requirements. In general, each Lesson Folder corresponds to approximately one week's work to complete the course in a semester, and two week's work to complete it in an academic year. It is essential that students and their families determine a deadline for the final completion of the course and establish due dates for each lesson folder according to what works best for them. Students must then pace themselves to work methodically through the course materials and adhere to their

deadlines in order to complete the course in a timely manner. [On the last page of the syllabus is a link for students to provide start, end, and vacation dates for the course that the instructor will use to compute and provide the student tentative due dates for each Lesson Folder.](#)

- **A Word About Cheating Yourself In This Math Course:** Keep in mind that the goal of this course is not to just jump through an educational hoop that costs you time, money and frustration but doesn't actually benefit you. Rather, it is to prepare you for success in later math and science courses where the skills you learn here are absolutely essential. Math is very cumulative and sequential, and my experience teaching math for over 30 years is that those who do not earnestly seek to understand the concepts by doing their own work only cheat themselves, and usually don't figure that out until much later when it is too late and too difficult to remedy. If you do your work honestly your grade will be an honest reflection of what you know going forward, and will also help guide you as make life decisions based on your unique gifts.

- **Grading Scale:**

A	90-100%	D	60-69%
B	80-89%	F	below 60%
C	70-79%		

Time and Effort Expectations

- Learning mathematics is no different than most anything else of significant lasting value—there is a cost involved to obtain it. Many students fall behind in their math courses simply because they don't expend the time and effort necessary for success. Depending upon the student skill and preparation, to complete this course in a semester will on average require 10-16 hours per week, and approximately half that each week for completion over an academic year. To be most effective, time should be allocated each day, preferably at the same time, and spent on task watching the lecture videos, taking notes, reading the textbook, doing the homework, reviewing previous material, and preparing for the exams. By keeping up with your work you will find that your daily efforts pay off in a level of understanding that allows you to face exams without worry or cramming. Remember that “yard by yard, math is hard, but inch by inch, math is a cinch”!

Organize Your Life:

- A large part of success not only in this math course but in any formal educational endeavor has to do with students' ability to effectively manage all aspects of their lives (family, work, recreation, finances, health, time, relationships, etc...) in such a way as to have in place the stable “infrastructure” upon which to build their education. Learning anything new, and especially mathematics, is hard work, perhaps harder than any job you will ever have. Students who are unsuccessful most often find it is not because they are incapable of learning the coursework, but because they have not adequately allowed for the extra time and effort from their normal routine that are required for success. It is therefore important that students and their families organize their lives to allow for the time and energy commitment necessary for the successful completion of this class and their educational goals.

Carpe Diem (Seize the Day):

- Students should also keep in mind that their formal education happens during a relatively short but important time of their lives. The time you invest now becoming proficient in important skills like mathematics will be rewarded throughout your life. On the other hand, the opportunities you have now for your education will diminish with time, and things that are easier for you to learn now in your youth will become more difficult. So “seize the day” by making the most of the opportunities you have while you have them.

The only difference between the successful person and everyone else is determination and persistence.

William J. O'Neil

Work Hard and You Will Succeed!

Tentative Course Schedule

(Print this Schedule For Reference Throughout the Course!)

NOTE: Each Lesson Folder corresponds to approximately one week's work to complete the course in a semester, and two week's work to complete it in an academic year. **Lesson folder due dates were emailed to students and parents upon enrollment, and those dates should be filled in on this sheet for reference throughout the course.**

"EOO" means "every other odd", i.e., 1,5,9, etc... Most assignments are for every other problem, but the goal is to learn the concepts, not just complete an assignment. Thus, students should do every odd problem as needed for topics with which they have greater difficulty. Alternatively, assignments marked *Every Odd Problem* are of particular importance and traditionally require extra practice; if extra practice is not needed, students are free to just do *Every Other Odd Problem*.

Lesson Folder	Due Dates	Sec	Class Topics	Assignment
			Course Introduction	Work through the Getting Started folder at the LMS. Use the link on the last page of the syllabus to provide your student information for the course to the instructor.
1		1.1	Understanding Whole Numbers	EOO problem (every odd if needed), Quick Quiz 1.1 (all)
		1.2	Adding Whole Number Expressions	EOO problem (every odd if needed), Quick Quiz 1.2 (all)
		1.3	Subtracting Whole Number Expressions	EOO problem (every odd if needed), Quick Quiz 1.3 (all)
		1.4	Multiplying Whole Number Expressions	EOO problem (every odd if needed), Quick Quiz 1.4 (all)
		1.5	Dividing Whole Number Expressions	EOO problem (every odd if needed), Quick Quiz 1.5 (all)
		1.6	Exponents and the Order of Operations	Every odd problem, Quick Quiz 1.6 (all)
			How Am I Doing? Sections 1.1 – 1.6	All problems
2		1.7	More on Algebraic Expressions	Every odd problem, Quick Quiz 1.7 (all)
		1.8	Introduction to Solving Linear Equations	Every odd problem, Quick Quiz 1.8 (all)
		1.9	Solving Applied Problems Using Several Operations	Every odd problem, Quick Quiz 1.9 (all)
			Chapter 1 Review Problems	EOO problem (every odd if needed)
			Chapter 1 Test	All
		2.1	Understanding Integers	Every odd problem, Quick Quiz 2.1 (all)
3		2.2	Adding Integers	Every odd problem, Quick Quiz 2.2 (all)
		2.3	Subtracting Integers	Every odd problem, Quick Quiz 2.3 (all)
			How Am I Doing? Sections 2.1 – 2.3	All problems
		2.4	Multiplying and Dividing Integers	Every odd problem, Quick Quiz 2.4 (all)
		2.5	Order of Operations and Applications	Every odd problem, Quick Quiz 2.5 (all)
		2.6	Simplifying and Evaluating Algebraic Expressions	Every odd problem, Quick Quiz 2.6 (all)
			Chapter 2 Review Problems	EOO problem (every odd if needed)
			Chapter 2 Test	All
4		3.1	Solving Equations of the Form $x + a = c$ and $x - a = c$	EOO problem (every odd if needed), Quick Quiz 3.1 (all)
		3.2	Solving Equations of the Form $ax = c$	EOO problem (every odd if needed), Quick Quiz 3.2 (all)
			How Am I Doing? Sections 3.1 – 3.2	All problems
		3.3	Equations and Geometric Formulas	Every odd problem, Quick Quiz 3.3 (all)
		3.4	Performing Operations With Exponents	Every odd problem, Quick Quiz 3.3 (all)
			Chapter 3 Review Problems	Every odd problem
			Chapter 3 Test	All
5		4.1	Factoring Whole Numbers	EOO problem (every odd if needed), Quick Quiz 4.1 (all)
		4.2	Understanding Fractions	Every odd problem, Quick Quiz 4.2 (all)
		4.3	Simplifying Fractional Expressions	Every odd problem, Quick Quiz 4.3 (all)
			How Am I Doing? Sections 4.1 – 4.3	All problems
		4.4	Simplifying Fractional Expressions with Exponents	Every odd problem, Quick Quiz 4.4 (all)
		4.5	Ratios and Rates	Every odd problem, Quick Quiz 4.5 (all)
	4.6	Proportions and Applications	EOO problem (every odd if needed), Quick Quiz 4.6 (all)	
6			Chapter 4 Review Problems	EOO problem (every odd if needed)
			Chapter 4 Test	All
		5.1	Multiplying and Dividing Fractional Expressions	Every odd problem, Quick Quiz 5.1 (all)
		5.2	Multiples and LCMs of Algebraic Expressions	Every odd problem, Quick Quiz 5.2 (all)
		5.3	Adding and Subtracting Fractional Expressions	Every odd problem, Quick Quiz 5.3 (all)
		5.4	Operations With Mixed Numbers	EOO problem (every odd if needed), Quick Quiz 5.4 (all)
7			How Am I Doing? Sections 5.1 – 5.4	All problems
		5.5	Order of Operations and Complex Fractions	Every odd problem, Quick Quiz 5.5 (all)
		5.6	Solving Applied Problems Involving Fractions	Every odd problem, Quick Quiz 5.6 (all)
		5.7	Solving Equations of the Form $x/a = c$	Every odd problem, Quick Quiz 5.7 (all)
			Chapter 5 Review Problems	Every odd problem
			Chapter 5 Test	All
8		6.1	Adding and Subtracting Polynomials	Every odd problem, Quick Quiz 6.1 (all)
		6.2	Multiplying Polynomials	Every odd problem, Quick Quiz 6.2 (all)
			How Am I Doing? Sections 6.1 – 6.2	All problems
		6.3	Translating From English to Algebra	Every odd problem, Quick Quiz 6.3 (all)
		6.4	Factoring Using the Greatest Common Factor	Every odd problem, Quick Quiz 6.4 (all)
			Chapter 6 Review Problems	Every odd problem
			Chapter 6 Test	All

9			Cumulative Test for Chapters 1-6	All
		7.1	Solving Equations Using One Principle of Equality	Every odd problem, Quick Quiz 7.1 (all)
		7.2	Solving Equations Using More Than One Principle	Every odd problem, Quick Quiz 7.2 (all)
		7.3	Solving Equations With Parentheses	Every odd problem, Quick Quiz 7.3 (all)
			How Am I Doing? Sections 7.1 – 7.3	All problems
		7.4	Solving Equations With Fractions	Every odd problem, Quick Quiz 7.4 (all)
		7.5	Using Equations to Solve Applied Problems	Every odd problem, Quick Quiz 7.5 (all)
10			Chapter 7 Review Problems	Every odd problem
			Chapter 7 Test	All
		8.1	Understanding Decimal Fractions	Every odd problem, Quick Quiz 8.1 (all)
		8.2	Adding and Subtracting Decimal Expressions	EOO problem (every odd if needed), Quick Quiz 8.2 (all)
		8.3	Multiplying and Dividing Decimal Expressions	EOO problem (every odd if needed), Quick Quiz 8.3 (all)
		8.4	Solving Equations and Applied Problems w/ Decimals	Every odd problem, Quick Quiz 8.4 (all). Students May Use Calculator With Discretion
			How Am I Doing? Sections 8.1 – 8.4	All problems
11		8.5	Estimating With Percents	Every odd problem, Quick Quiz 8.5 (all)
		8.6	Percents	Every odd problem, Quick Quiz 8.6 (all). Students May Use Calculator With Discretion
		8.7	Solving Percent Problems Using Equations	Every odd problem, Quick Quiz 8.7 (all). Students May Use Calculator With Discretion
		8.8	Solving Percent Equations Using Proportions	EOO problem (every odd if needed), Quick Quiz 8.8 (all). Students May Use Calculator With Discretion
		8.9	Solving Applied Problems Involving Percents	Every odd problem, Quick Quiz 8.9 (all). Students May Use Calculator With Discretion
			Chapter 8 Review Problems	EOO problem (every odd if needed). Students May Use Calculator With Discretion
			Chapter 8 Test	All. Students May Use Calculator With Discretion
12		9.1	Interpreting and Constructing Graphs	EOO problem (every odd if needed), Quick Quiz 9.1 (all)
		9.2	Mean, Median and Mode	EOO problem (every odd if needed), Quick Quiz 9.2 (all)
			How Am I Doing? Sections 9.1 – 9.2	All problems
		9.3	The Rectangular Coordinate System	Every odd problem, Quick Quiz 9.3 (all)
		9.4	Linear Equations in Two Variables	Every odd problem, Quick Quiz 9.4 (all)
			Chapter 9 Review Problems	Every odd problem
			Chapter 9 Test	All
13		10.1	Using Unit Fractions w/ U.S. and Metric Units	Every odd problem, Quick Quiz 10.1 (all). Students May Use Calculator With Discretion
		10.2	Converting Between the U.S. and Metric Systems	Every odd problem, Quick Quiz 10.2 (all). Students May Use Calculator With Discretion
		10.3	Angles	Every odd problem, Quick Quiz 10.3 (all)
			How Am I Doing? Sections 10.1 – 10.3	All problems
		10.4	Square Roots and the Pythagorean Theorem	Every odd problem, Quick Quiz 10.4 (all)
		10.5	The Circle	Every odd problem, Quick Quiz 10.5 (all). Students May Use Calculator With Discretion
		10.6	Volume	Every odd problem, Quick Quiz 10.6 (all). Students May Use Calculator With Discretion
		10.7	Similar Geometric Figures	Every odd problem, Quick Quiz 10.7 (all). Students May Use Calculator With Discretion
14			Chapter 10 Review Problems	Every odd problem. Students May Use Calculator With Discretion
			Chapter 10 Test	All. Students May Use Calculator With Discretion
			Final Exam Review (See LMS)	All. Students May Use Calculator With Discretion
			Final Exam	See LMS. A Calculator is not allowed, and the problems are written so as to not require its use.

Do not worry about your difficulties in mathematics. I assure you that mine are still greater.
Albert Einstein
